

## Machine Learning Engineer Test

### Articles Grouping/Similarity

You have a list of articles with title, URL, and body(Optional). We need to group articles based on the topic for each article. it is a classification and grouping problem. You may need to crawl articles without a body.

Here is the list of topics(we need to group the articles based on it):

Marketing, Product Management, Company Culture, Business Fundamentals, Product discovery, Startup fundamentals, People management, Business growth, Investment cycle, Branding, Sales And Business Growth, Growth strategies, Company Growth, Growth marketing, Product growth, Product management fundamentals, Agile principles, Business fundamentals, Interpersonal skills, Product discovery

Output:

- JSON file with the same input hierarchy but with extra "topic" field.
- Python file with your code.
- Documentation of your solution, in only 1 page.
